PETAN Announces New Date for SAIPEC 2022 Physical Event

The Petroleum Technology Association of Nigeria (PETAN), has announced a new date to host a physical event for the 6th Sub Saharan Africa International Petroleum Exhibition and Conference (SAIPEC), which stands as not only the largest event in the centre of the region's oil and gas hub but also the only truly industry-led event, held in partnership with the country's petroleum sector.

PETAN's sixth edition of SAIPEC will once again set the stage for Africa's energy, oil and gas professionals on 23 – 25 February 2022 at the Eko Hotel in Lagos, Nigeria.

Building upon the success of the 2021 edition, the PETAN Chairman, Mr Nicolas Odinuwe, promises to deepen collaboration between the SAIPEC member countries alongside the African Continental Free Trade Area (AFCFTA) for SAIPEC 2022.

According to a report, Sub-Saharan Africa has about 62.6 billion barrels of proven crude reserves with an estimated 221.6 trillion cubic feet of natural gas reserves, which has positioned the region to be the last energy frontier and global hub.

Odinuwe said, "SAIPEC was created as an awareness informative platform for the Sub-Saharan Africa oil and gas industry with a strong focus on regional collaboration within the African market.

"SAIPEC is one of those good catalysts to fostering collaboration and deepening local content in the African continent.

"Through this partnership with SAIPEC, we intend to develop stronger collaboration between SAIPEC member countries alongside the African Continental Free Trade Area (AFCFTA) as well as increasing regional investment.

"The value chain in the African energy industry if properly harnessed will transform the economies in the continent and make us stop looking out for donor agencies."

SAIPEC is a sell-out event, hosted by the Petroleum Technology Association of Nigeria. The event features over 80 industry leaders and global experts on an insightful programme which was held alongside the sold-out exhibition with over 111

companies showcasing their products and services and generating meetings with thousands of invested industry professionals.

Over 6000 attendees participated in total, from 36 countries, including 20 National Oil Companies from Mozambique, Nigeria, Côte d'Ivoire, Senegal, Uganda, Angola, Cameroon, Ghana, Liberia, Equatorial Guinea and Gambia.

Notes to Editors

About the Sub Saharan Africa International Petroleum Exhibition and Conference

SAIPEC is hosted by the Petroleum Technology Association of Nigeria (PETAN), a leading organisation that represents oilfield services and technology companies operating across upstream through to downstream projects. PETAN is a leader in the promotion of innovative engineering and creative solutions, that help advance the petroleum industry both nationally and regionally.

Year on year, SAIPEC continues to address the needs of companies seeking to showcase their innovative solutions and new technologies, and to support the development of major new business and partnerships to benefit Sub Saharan Africa's petroleum economy.
